

Tech Days Program

Tuesday, June 24, 2025

From 1:30 p.m.

Arrival and snacks

2:00 – 2:55 p.m.

**Roadmap of the C Platform
for 2025/26 and Beyond**

To kick off the Tech Days, we will give you an outlook on the future development of the **C platform**. You will learn how our corporate group is strategically positioning itself for the coming years, which new market demands we are addressing, and which technological innovations we are embracing to continue providing you with powerful and future-proof solutions.

3:00 – 3:55 p.m.

**What's new in Version C 2025.1
and 2025.2**

In this presentation, you will receive a concise overview of the key new features, enhancements, and functions in the current Version C 2025.1, as well as a preview of the upcoming highlights in Version C 2025.2, which will be available starting in September. We will present updates in **speedikon® C**, **Framence**, **DAMS C**, and **WiriTec® C**, and demonstrate with practical examples how these innovations can make your daily workflows more efficient and measurably boost your productivity.

4:00 – 4:55 p.m.

**Artificial Intelligence: Between
Hype and Real-World Application**

Everyone is talking about Artificial Intelligence – but what's really behind it when it comes to industrial use? In this talk, we take a closer look at what AI can already achieve today, which solutions are already being used productively, and where it delivers real added value. At the same time, we critically examine current trends and clearly separate real potential from exaggerated hype. Look forward to exciting insights, practical examples, and an honest view of the current state of AI.

From 5:00 p.m.

**Relaxed Get-Together with
Industry Peers**
over Cold Drinks and BBQ

Following the presentations, take the opportunity to network with colleagues from other companies and the consultants of the speedikon group – an ideal setting for exchanging ideas in a relaxed atmosphere.

Tech Days Program

Wednesday, June 25, 2025

9:00 a.m. – 12:00 p.m.

WORKSHOP

Knowledge Management with AI

In this workshop, we'll share our own journey to show how AI can be meaningfully applied in knowledge management. Drawing on three years of development, we speak openly about our experiences, successes, and missteps, and provide a practical look at solutions that truly work. You'll learn what AI in knowledge management can realistically do, where its limitations lie, and how to deal with the presence – or absence – of AI systems in your organization.

As a special highlight, you'll have the opportunity to test our AI solution using your own documents. If you're interested, [please contact us](#) by June 6 so we can prepare your materials accordingly.

9:00 a.m. – 12:00 p.m.

USER GROUPS

on **DAMS C**, Evolving FM Processes with **speedikon® C** and Energy & Resource Management with **WiriTec® C**

At the same time, we'll be hosting parallel User Groups focusing on **DAMS C**, evolving FM processes with **speedikon® C**, and energy and resource management with **WiriTec® C**. Take advantage of this opportunity to exchange ideas with peers in a trusted setting – share your daily challenges, learn from others' approaches, and present your own successes and insights gained from using our software solutions.

1:00 – 4:00 p.m.

WORKSHOP

Knowledge Management with AI

To ensure you don't have to choose between attending the AI workshop and participating in a User Group, we're offering the workshop again in the afternoon.
