**Bensheim, Germany, February 4, 2026** – WiriTec GmbH, a German software company specializing in the digitalization of energy-related processes, has announced a partnership with Grupo Porta, one of Chile's leading companies in electrical engineering, renewable energy solutions, and industrial monitoring.

As WiriTec's official partner in Chile, Grupo Porta will promote, implement, and support **WiriTec® C** for customers across mining, industry, and infrastructure projects. Known for its ability to handle demanding operational environments and reduce project management times through efficient engineering processes, Grupo Porta brings deep local expertise to the partnership.

**WiriTec® C** provides complete transparency over energy and resource consumption, delivers detailed analytics, and helps companies identify costly inefficiencies.

Through this partnership, organizations in Chile and Latin America will gain a powerful tool to improve energy performance, reduce operational costs, and strengthen sustainability initiatives.

“This partnership allows us to bring **WiriTec® C** into one of Latin America’s most important industrial markets,” says Adrian Merkel, Managing Director of WiriTec GmbH. “Grupo Porta’s long-standing experience and strong market position make them an ideal partner to help companies make their energy processes smarter and more efficient.”

“We are proud to partner with WiriTec and introduce **WiriTec® C** to our customers,” says Fernando Monsalves, CEO of Grupo Porta. “With this solution, companies can understand their energy consumption with much greater precision and make better, faster decisions based on reliable data.”

### About WiriTec

WiriTec GmbH is an innovative software company specializing in the digitalization of energy-related processes in buildings, data centers and industrial plants. Since 2009, it has been offering products, solutions and technologies as well as all services that enable customers to make their business processes in the energy sector smarter. As part of the speedikon group of companies, WiriTec GmbH benefits from cross-company expertise in the areas of facility management, data center management, photorealistic digital twins, artificial intelligence and robotics. WiriTec GmbH's employees have extensive experience in dealing with large amounts of data, complex databases and integration into existing software and hardware solutions.
